
Wallet by Nicholas Lawrence

From the mind of Nicholas Lawrence comes **wallet.**

wallet. is a deceptive utility device disguised as an everyday minimalist wallet that allows the performer to accomplish visual effects, including a variety of magic routines that look and feel effortless!

With **wallet.** you can perform:

Transformations

Visual switches

Appearances in the spectator's hands

Card to wallet

Disappearances in your spectator's hands

Predictions

Object to impossible location

And so much more! It's perfect for any type of performer, from mind readers to the visualist... you'll find something that suits your taste and style!

The wallet itself was designed to be sleek and traditional, made from high quality leather. Most importantly it was designed to be a tool for the pro magician.

The best part, it doesn't look like a magic prop!

wallet. has a deceptive secret within the design, hidden in plain sight, allowing your spectators to examine the wallet throughout your routines!
