
Hole On A Sec Blue By Zamm Wong & Magic Action

The holes transposition is a visually stunning and mind blowing effect. Holes jumping from place to place as if the fabric of reality is bending on a little playing card. But hold on... what is the purpose of this?

Hole On A Sec by *Magic Action* is bringing new meaning to the mysterious jumping holes. Numerous holes are punched on a single playing card. The holes would not just jump, but reveal the card your spectators have in their mind in a split second. With light passing through the holes, your audience can see the very moment the magic happens, like stars regrouping into a fortune telling horoscope.

- Easy to control
- Reset in seconds
- Suitable for both video and live performance
