## **iCANDY (Gimmicks & Online Instruction) by Peter Eggink**

Powerful, visual magic done "in the hands" with organic objects is the best any magician can do. Everybody can relate to Candy from children to adults and definitely creates a maximum impact!

Basic routine:

Have a spectator choose 2 different coloured candy's, and have them cup their hand around them. Next, you take one of the candy's out of their hand without them seeing it. It's a 50/50 chance that the spectator will "guess" the right color so that is not too magical...until you magically and visually make the candy disappear, only to have it re-appeared INSIDE their hands!

**iCandy** allows you to perform amazing visual effects from transpo's, color changes, penetrations and much more! Check out the video and let the magic speak for itself.

The gimmick adapts to both popular brands: Fruit-tella and Starburst.

**iCandy** comes complete with special **iCandy** gimmicks (including the option to adapt the gimmick to fruit-tella or Starburst), and online video instructions that goes in detail on various effects/routines including the vanishes.
