
ELECTRIC DECK DELUXE (Blue) by Ronjo

The most versatile **Electric Deck** that has ever been constructed. Cards move and flow in any direction, even in a circular pattern! spread, fan, rotate & waterfall.

This is a completely Self-Working deck that you can use to act as if you are performing serious manipulations that require lots of skill and years of practice to master. As you use this, you will acquire muscle memory that will actually train you to be able to do the hard working moves with an ordinary deck.

Pro Tip: Add a few real loose cards to the top of the gimmick deck to create the illusion of a regular deck. You can now shuffle, cut and even have a card selected. Openly or secretly remove these cards and proceed with your routine!

This deck is painstakingly hand crafted. It does not use strings, tape or staples as other similar decks do. Our version enables you to maneuver the cards freely in any direction and because of the way they are assembled, the cards flow with a speed and tightness never seen before.
