## The Player's Card by Paul Carnazzo

**The Player's Card** is a two sided card that shows the actual rank of hands for both Five Card Poker and Three Card Poker. It appears to be one of the extra cards that come with a deck of cards.

After talking about Poker tells, you ask your spectator to think of any four of a kind. After trying to "read their tells", you are able to tell them which four of a kind they are thinking of!

You can immediately repeat the process with another value using the other side of the card.

You'll receive the professionally printed, linen finish double sided **Player's Card** and downloadable instructional PDF.
