Fragment by Abstract Effects

Fragment is a clever and practical approach to the visual appearing deck effect, including additional applications such as smooth transpositions and deck vanishes utilizing the Fragment gimmick.

This is a collaboration from the entire *Abstract Effects* team teaching you how to use the **Fragment** gimmick in detail, including over 10 unique, surprising variations and ideas!

The main effect is an extremely visual and fair transposition of a full deck of cards with your spectators signed selection that will leave your audience stunned!

It's great for live performances and is absolute gold for your social media! With **Fragment** there is something for everyone.

Not only are over 10 variations taught in the instructional video, but Nicholas Lawrence teaches a very special bonus effect that works perfectly with **Fragment**!
