## **HYPER NEON by Riffle Shuffle - Pokerdeck**

**LIMITED EDITION: Only 2500 printed! Will NOT be reprinted.**

After years of waiting, we are now bringing back a new edition of Neon Lines - The **Hyper Neon Playing Cards**.

Designed for Cardistry, the Hyper Neons kept its original design with contrasting colours and trajectory lines, but with added circular lines and dots to make your cardistry moves pop out! Spreads, fans, displays, you name it, the Hyper Neons will boost up your flow as if travelling at hyper speed!

With the incredible work from ITS TEAM, the cards' faces have also gotten a fresher look. Each of the suits is having more details from the previous version, introducing more dimension to the deck. Whether you are spreading from the back or the face, with the added lines to the edges, you can now enjoy the beautiful flow of lines from the face of the cards.

The **Hyper Neon Playing Cards** will be printed by USPCC on their Bee crushed stock, perfect for showing off your speedy moves.

Limited to 2500 decks.
