
Fake Egg Brown by Quique Marduk

This *special Egg* is made of PVC. It's a great advantage that the egg is made out of PVC because heat doesn't hurt the material like it does to latex, it is not painted, and the color is forever.

With it, you can perform a lot of magic effects and gags. Perform the vanishing egg; place it into a paper bag and crushing it! Use it for the Orange, Lemon, Egg, Canary Trick, and many other effects. Use your imagination and you will love it!!

Important:

The egg is unalterable, you can wash it with water and soap. Another note, If you allow the egg to be wrinkled for a long period of time it will permanently have a mark on it. To take out marks, use a hairdryer with heat for a few seconds and it should be like new again.
