
Marked Jumbo ESP Cards (Black) by Tejinaya Magic

Extremely popular magic designed in a more powerful way! Here's our latest marked system -- you'll love it! This system enables you to perform completely new and unique ways to perform mentalism effects.

The marked system of the Syouma Inventor has a very high reputation. Easy mentalism with our original ESP jumbo cards. Many magic routines can be performed utilizing this marked system devised by Shoma. The marks are very easy to understand, but if you don't know the system, you won't notice the marks. You can do wild things like guessing games with your audience. For example: *"I'll have my audience volunteer hold one of my favorite cards face down in front of her stomach. In case you think these are marked, please cover the card with both palms to hide the mark"*. Even in this situation, the magician is still able to name the card or show a match with his! It's also dynamic and interesting to have five people hold one card in front of their stomach with both hands and you are able to name or match their cards, one after another!

With our instructional video, you'll find it is easy -- you can perform it right away!

Included: ESP card 5 types x 2 each and online instructions.
