
Appearing SnowStorming Fan V2 (Blue Hologram) by Victor Voitko

2 killer effects in a row!

First a BIG fan appears...

Second, a HUGE confetti snowstorm out of nowhere!!!

Please note these revolutionary points:

No extra confetti load from your hands, everything is self-contained; just make the fan appear and everything flows until the climax.

Also, a new effect has been added:

You take three napkins, squeeze them, then a fan appears, and your napkins turn into multicolored confetti. The confetti originally appears in one color, then in another color, and finally in the third color. You can use two napkins, red and green, for Christmas shows!

A confetti snowstorm out of nowhere!

Specifications:
