
IMPOSSIBLE by Hank & Himitsu Magic

In fact, as early as two years ago, this product started to be played at magic conventions in all countries, restaurant extension tables, friends gathering, buying sports coupons, and was played by the boss cue. The performance must have been broken a thousand times.

The prototype was even in Malaysia in 2018. There were professors at the conference lectures. Although it was enough at that time and could fool many people, it still caught some minor problems and imperfections... After these intermediate trials, TMA officially launched this final version of the impossible color card this year. Two years ... I spent two years delving into this process... All the possible situations you will encounter, I have all encountered And all can be resolved, you will never encounter a situation I have never encountered product features:

1. Can be shown to the audience repeatedly immediately, and the audience will feel more magical
2. Easy to carry
3. Friends of all sizes can intuitively understand the color correspondence
4. Excellent interaction
5. Absolute combat

This is **IMPOSSIBLE** by Hank Wu & Himitsu Magic
