
Raven Starter Kit

Imagine the power of this awesome effect: You show a coin and place it on your spectator's hand. With complete confidence you wave your hand (fingers open) over the coin...

The coin vanishes right before the spectator's eyes in one of the most visual moments in all of magic. The best part is, your hands can be shown completely clean!

No sleights, no odd moves. This is truly one of the best investments in all of street magic.

It works with many different objects, not just coins. And in addition to vanishes, you can make an object appear, turn one object into another object, or shrink a coin into a miniature-sized coin. Many additional effects are possible with bills, matchbooks, and playing cards.

Why we love it

- It looks like real magic.
- It's a professional effect that's easy to perform
- We love blowing away other magicians when we perform the **Raven** in short sleeves!
- It's a great investment because many other effects become possible when you own the **Raven**.

This is the original **Raven**.
