
RFA Wallet by Tony Miller

The **FIRST** wallet to bear our company name! The **RFA Wallet**. We have created a lot of really cool wallets. But this is the first that solves several basic problems with loading wallets.

Wardrobe... In other words, tight pants are **NOT** a problem. Load it while it is **ANY** pocket, front/back pants. Side or inside jacket pocket. Even your shirt pocket!

Load the wallet without having to actually put your hand in the pocket!

No worries about the card jamming halfway down in the loading process.

Besides being a near-perfect loading wallet, it is **ALSO** a **FULL-SURFACE PEEK** wallet. **AND** you can steal from it just as easily as you load it.

And it does **ALL THE ABOVE...** WITH a **ZIPPER ALL AROUND THE WALLET!**
