
The Rehearsal Ball by Luis de Matos

For the proud owners of our Professional Floating Ball, we thought that it would be handy to have a rehearsal ball similar in size, weight and with the eyelets on top.

It is very useful for developing new moves, trying out the rig at a new venue, or even experimenting with different kinds of thread.

The Rehearsal Ball can also be used to try different customizations.

NOTE: Ships in strong cardboard box for protection but not the flight case that is only sold with the Professional Floating Ball package.
