## Skymember Presents Midas Touch by Julio Montoro

Pull out an object from the drawing/flyer like a real wizard! An effect based on 3D Advertising by Henry Evans.

In 2017, Julio Montoro was assigned a mission to create an opener magic effect for Ms Dania Diaz's *America's Got Talent* appearance. Imagination is the foundation of everything. When the imaginary is so strong, it will turn into reality.

Enter **Midas Touch** by Julio Montoro.

After 3 years of working and manufacturing at Skymember Presents, we can finally bring you the **Midas Touch**.

**Midas Touch** comes in two variations for a different presentation.

First is the Sketch Edition, where the performer turns a drawing into reality. The paper is laminated, water-resistant and has low transparency. The paper is also erasable, meaning that it can be fully customisable for each performance.

Last is the flyer edition, with eye-popping colors that will guarantee to catch your audience's attention. You may immediately hand out everything for the examination. The flyer is custom designed and printed in high resolution to look like a standard flyer.

If you want to be like a real wizard, you must not miss this out. Get yours now worldwide.

### Features:

- Two variation gimmick pack for a different presentations.
- Superb quality gimmick and realistic.
- You may hand out the imaginary item as a souvenir.
- Eye-popping magic. Designed for the big stage and social media. Compatible for parlor and closeup as well.
- Easy to learn and fun to perform.
- Taught expertly by Zach Ng, a professional worker magician.

### Disclaimer:

---

Each Midas Touch comes with a complete designs pack (template) and necessary props. However, the main props to assemble the gimmicked flyer/drawing is limited. Therefore, please choose your desired designs and watch the tutorial before attempt to build your own.

Commercial rights are reserved for **Midas Touch**, including but not limited to TV and web shows. Kindly contact Skymember Presents for commercial inquiries.
