
Match Pull Pro by Trevor Duffy

Produce a LIT match!

This device has been designed and manufactured with the professional in mind. It holds 3 matches at a time, which are loaded in from the top, quickly and easily - *in place where the device is attached!*

- Stainless Steel construction - black powder coated
- Attaches with Bar Pin behind jacket lapel or anywhere else on clothing
- Striker pads are very easily replaced - full instructions included
- Uses any wooden match from 3 mm - 4 mm size head (1/8 - 5/32 inch)
- We recommend using a *longer* match, which makes it easier to grip and strike.
- With the use of Velcro or Neodymium magnets (not supplied) the device could be attached elsewhere.

"I believe this is the best made match pull I have ever seen!!!"

- Nathan Kranzo
