## **ON TIME by Juan Pablo**

Juan Pablo's new take on the hour prediction.

You have an image of a handless clock and ask someone from the audience to randomly choose an hour and minutes. You draw the hands with a marker on the clock, and immediately reveal that your prediction matches their selections!

A revolutionary multiple-out system that will allow you to give them a lot of options, and even let them change their minds... This will fool magicians, too!

Really easy to perform.

Instant reset.

Use it as a quick opener, or in the middle of the show.

You can perform it seriously or doing comedy. Includes a gag that you can use in the middle of the routine.

It's a killer routine for the mental performer and it's also perfect for the magician who wants to add a strong touch of mental magic in his show.
