
Giant Feather Fantasy by Mr. Magic

Here's a wonderful way to cause multiple magical changes and thrill your audience!

You place a plume inside a decorated tube. Even though the tube was previously shown empty, when the plume is pulled out, it has changed into a beautiful bouquet of flowers! A blue plume changes to yellow. An orange plume changes into a red and white flag. A red plume turns orange. A green plume turns into an umbrella! Each time a plume is placed inside the tube, it comes out either colored differently, or as a completely different item. Wow!
