
Collusion Ring (Small) by Mechanic Industries

Engineered to be the ultimate ring for use in sleight-of-hand magic routines. The **Collusion Ring** is a wearable magic item that links up with a host of other items in the full set. Cast in high-carbon stainless steel and finished with a dark ebony inlay. Extra grip, superior handling and a showroom finish, this is a total upgrade for ring magic.

You now get the benefit of extra coin style grip in all of your sleights and flourishes thanks to the double-sided edge milling. It matches our Grinder coin exactly and even has perfect detailing on the inside. You can now perform seamless Spellbound type routines transforming the ring into our Grinder coin.

Supported with video tutorials to get you going if you are new to ring magic. We also have some cool new ideas for magicians already familiar with the basics. If you have the full set, getting a dupe ring opens up more sleight combos and routine possibilities.

Available in S / M / L - Please check size guide before ordering. Small interior diameter 20mm

NOTE:

We suggest choosing a size that easily slides over the knuckle of your index finger. The best fit for use in magic performance is a size that can be worn on your thumb or middle finger
