**Sudden Deck 3.0** is the ultimate opener for any card set. Used by professionals all over the world. **Sudden Deck 3.0** has no equal.

**Sudden Deck 3.0** is completely self-contained. You can show the box front and back after the printing process.

### Here's what happens:

You show a blank un-assembled card box you got straight from the factory. You explain that this is what the box looks like before it is printed. In a snap, the front of the box is completely printed. Next, you show the box on both sides and proceed to assemble the previously flat box and print the labels on every side of the box. Next, you produce a full deck from the now assembled box and you are ready to start your show.
