
3 to 1 Rope Pro by Magie Climax

The Professor's Nightmare is a classic of magic that lends itself to all types of presentations.

You start by showing 3 ropes of different lengths: a small, medium and a long rope.

After folding them in half, the 3 ropes are found to be all the same length!

Imagine now being able to merge - visually these 3 ropes - to form 1 rope!

It's possible with **3 to 1 Rope Pro!**

You let go of one... then 2 ropes... to keep only one end in your hand, and now there is only one long, single rope hanging at your hand: the 3 ropes seem to have magically welded together.

As a bonus, you can use this same rope to achieve a cut-and-restored rope trick. Very visual and very clean!

- A classic effect with a twist!
- Easy handling, accessible to all
- Explanation on a video link in French and English
- Climax Manufacturing
