
Charming Chinese Triumph by Bocopo Magic & Silver Wing

Triumph is effect with a long history. In the years of the development of magic, this effect has been performed or improved upon by countless magicians, resulting in a variety of different editions.

CCT, created by Silver Wing, is one version of the classic 'Triumph' plot. The feature of this edition is that all steps are clear to the audience: After the audience chooses a card, it is clear that the cards have been shuffled together face-to-face. Both sides can be shown to the audience and they will see it's really a chaos of cards facing different ways. Eventually, without any handling, when the deck is spread out on the table, all the cards are face up, except for one face-down card -- the selected card!

In addition, **CCT** can also be performed stand up, which turns the original table routine into a parlor act, so you can perform for larger audiences and higher fees.

The props include:

- 1 Gaff deck (maiden back)
- 1 Bicycle Maiden Back deck
- Online instructions
