
Midnight Breakfast by The Other Brothers

Midnight Breakfast is a gigantic leap forward in the "Out to Lunch" principle as it requires no rubber bands, no clips and is 100% organic with everyday objects. With this invisible gimmick, you can perform every Out to Lunch effect to create powerful, visual moments.

The Other Brothers also teach new and original effects never before possible with existing gimmicks, including a deeply fooling multi-phase routine, using any currency, involving: a torn & restored bill, magic that happens in the spectator's hands and an object to impossible location.

Midnight Breakfast by The Other Brothers and The Abstract Effect Team is one of the most versatile utility gimmicks on the market; from mentalism to visual magic, you can do it all with just one gimmick!
