
The Magic Cube by Gustavo Raley

Introducing one of the most innovative and creative effects of this year. A number of effects and presentations are possible with **The Magic Cube**.

EFFECT 1: The magician shows the audience a DVD cover - he states that inside are instructions on how to solve the Rubik's Cube with this DVD in seconds. Next, open the DVD box and in a very visual and striking way, a Rubik's Cube appears from inside the box! In less than three seconds, you solve the cube!

EFFECT 2: Show a completely flat magazine. Open it and show a page that advertises the Rubik's Cube. Close it and, after just a quick second, open it and the drawing of the cube materializes and comes into your hands! You then solve the Rubik's Cube in a very visual way.

Very powerful and very visual routines. Ideal as your opening trick!
