## Pro Secco by Gary James

A production holder for flutes and small bottles. They truly seem to magically appear - looks great! It can also be used in reverse to vanish a glass. 100% no fear of the glass popping out, so you can relax and get on with your performance.

*"Gary James Pro Secco is the kind of prop you expect from a pro. Streamlined, versatile, simple to set up prior to performing and does the job right. There's also a multitude of ways to use the gimmick with glasses and bottles of various sizes. My highest recommendation."*

- **Bill Abbott**
