
JUMP CUBE by SYOUMA

A Rubik's cube puzzle that is thoroughly mixed is placed on the palm of the hand. Just tossing it over from the right hand to the left with the pom-poms a couple of times, you'll get the whole picture - it is completely solved! The complete cube can then be handed over to the audience. Very easy and amazing! It is also recommended for beginners.

This product requires you to create a gimmick yourself.

Complete set of materials required for making (except cubes), along with an instructional DVD.

Note: Since a normal Rubik's cube is not included, please prepare separately.
