
Marchand de Trucs & Mindbox Presents The Viper Wallet by Sylvain Vip & Maxime Schucht

In 2014, a highly select group of mentalists were given access to a card holder that incorporated a new kind of peek.

At the time of its release, the holder's ability to provide a quick, simple and undetectable peek earned it a reputation as one of the best peek wallets in existence.

Although a host of performers have since attempted to get their hands on one of the few available units, their efforts have consistently proved unsuccessful.

Until now.

Viper is back - and it's more powerful than ever.

Viper is a stylish leather card holder, but its innocent appearance conceals a diabolical secret that enables you to read people's minds.

The ingenious **Viper** system gives you instant access to any written information (text, drawings, numbers, etc.) that is inserted into the card holder.

As soon as the information is placed into the holder, **Viper** can immediately be closed. Whenever you need to, you are then able to see - clearly and in full - exactly what your spectator has written, without having to open **Viper** again, or perform any suspicious moves.

You can even show **Viper** on both sides - there's nothing to fear, because there's nothing to see, unless you decide otherwise...

The **Viper** system gives you a full peek of anything that can be written on a business card.

And, just to push things even further, we've made sure that Viper can give you access to written information from multiple spectators in a single peek!

Viper can also be used to load and steal business cards, billets and playing cards.

With its natural, slimline form factor, **Viper** can be easily slipped into any jacket or pants pocket.

Viper is designed to be used as an everyday item, and can carry your credit cards, business cards and loyalty cards.

Stylish, stealthy and powerful, Viper is an indispensable tool in the modern mentalist's arsenal.
