## **JUMBO Split Card by Syouma**

This is the ultimate "match" in magic!!

Five JUMBO playing cards are shown, and each has been split into two halves. These are very big cards! Each half is almost the same size as A4 size.

Your audience volunteer places a half card on a table, face down. Each time they place one down, you do the same with one of yours. After all have been dealt, the spectator shows their first card - it matches with your first card. This is repeated for all the cards - each half always matches. Powerful mind reading!

Unlike using ordinary-sized cards, the audience reaction is HUGE using these giant cards!

Marked features make it easy for beginners.

- Approximately A4 size half card x 10 sheets
- Online instruction video
