## **George McBride's McMiracles with Cards**

*"Once you watch this DVD, you'll understand why I believe George is among the best in the world."*

**- Steve Friedberg**

Scotland's own George McBride is widely known amongst the underground magic fraternity as a card handler of superlative skill. A contemporary of Roy Walton, Gordon Bruce, Jerry Sadowitz and Peter Duffie, he is a master technician and renowned for his ingenious trick construction.

**George McBride's McMiracles With Cards** is the definitive collection of all the routines George has developed and refined over the last decade of obsessive work. Avoiding overly complex and unnecessarily labyrinthine structures these tricks are honed into laser focused, streamlined masterpieces. Everything on this project is a trick you **WILL WANT TO PERFORM!**

Over a staggering 2 hours, George unleashes 17 routines, carefully structured into 4 'sets'. The material ranges from incredibly easy to do, right through to 'that is something I want to do when I grow up'.

The wealth of knowledge squeezed into this project is breathtaking. Technique, construction, overlapping method, awe inspiring sleights - it's all here! And you can learn the lot!
