
FISHING CARD by Aboutmagic

This magic item is invented by Youngho-Park and also collaborated with Aboutmagic.

Many magicians praised him and his original trick.

This is '**FISHING CARD**' by Park Young-ho, a magician who sold out the product after the 2018 FISM session.

The effect is very simple.

It's a magic trick to find the signed audience's card with a fishing rod.

You don't need to do a force or a deck switch.

That's how easy it is.

The rod is 8" and 38.5" fully extended.
