## The NOTEBILL by JOTA

A great addition to your magic and mentalism arsenal!

**The NOTEBILL** is a tool that looks like a normal sticky note, and allows you to change a bill for another, invisibly, in front of the spectator's eyes. In addition to predicting or guessing the serial number, you can destroy, recompose or teleport the bill. In addition, you can force words, numbers or images from notes, pieces of newspaper, photos and much more!

The limit is your imagination!

It is specially designed from a super resistant plastic with leather finish. You can refill as many times as you need with standard size sticky notes. It is very easy to perform, it works with any currency bill, and you can present it in close-up or for large audiences.
