
Principia by Harapan Ong - Buch

Singapore's Harapan Ong has caused an online sensation with his technical abilities. Videos began to circulate some years ago showing a pair of hands doing extraordinary things. His style is natural, unassuming, and soft. But Aces appear, selections transpose, and magical things just seem to happen in Harapan's hands.

Principia is our very favorite kind of magic book: the kind of book that you pour over every page, trying out each and every piece inside. EVERY single effect in the book (and there are 60 effects described) is practical, fun and radically new.

The concept of **Principia** is a magic book fused with a scientific paper on physics. By day, Harapan is a physics teacher and he uses the same laser-focus and precision in both his career and his magic. The results are magnificent.

Harapan's specialty is the under-the-spread cull, and he has created several new techniques in association with this classic tool. The book also features impromptu magic, gaffed card magic, and dead-on easy tricks you can do the first time you try them. We predict that **Principia** will be the most talked-about card book of the year, and that it will be studied and returned to for many years to come.

Hard cover. 253 pages.

"Wonderful!"

- **David Williamson**

"My favorite magician."

- **Stephen Long**

"Buy it!"

- **Tony Chang**

"Buy the book."

- **Kevin Ho**

"The most beautifully constructed card magic I've ever seen."

- **Henry Harrius**
