
AppeaRing Black by Bocopo Magic & Silver Wing

Love is an eternal topic that spans all regions, races, ages and artistic fields. The ring represents the permanent commitment between lovers.

In the long history of magic, there are many magic effects related to the ring, such as teleportation, vanishing, floating, color changing and linking together. Now, **AppeaRing** is available for you, filling a void that only this new effect can accomplish! You can perform the Appearing Ring effect with it as easy as winking.

It offers you an entirely new possibility when you want to propose or confess your love.

AppeaRing is a fully automatic magic prop. Secretly load the ring. Then, simply press a button and the effect will occur.

It uses servomotors to provide sufficient power, and a built-in matching program to control the mechanical arm's rotation angle. We packed pcb's, power modules, batteries, and remote control modules into this small box, and there is still enough room for the ring to be placed inside. This was a miracle in itself!

It can adapt to most sizes of rings. Just buckle the lid and the ring appears. You can also use it to perform other miracles (e.g., the ring can appear without buckling the lid)!

AppeaRing has both manual and remote-control versions. The switch is perfectly hidden -- you can trigger it without anyone noticing. And with the remote control version, you can trigger it within a 10m effective range.

Love is so special in this world. So, use the **AppeaRing** to find your true love or for a particularly romantic and beautiful effect.
