
Crystal Playing Card Display Case By TCC

This beautiful transparent case enables your deck of cards to be fully displayed, while also protecting your cards in all directions. Your cards can be displayed with or without their cardboard case.

And - if you are a card collector, this is a beautiful and elegant way to display your collection.

We have chosen the top acrylic material. This not only adds beauty and protection, but it also feels nice in your hand.

In order to maximize the display of the deck, the transparency of the material plays an important role here. Of course, the top portion expertly meets this criteria.

Most of the cards produced by USPCC can be placed into this case. Regardless of the long side and wide side gap, we control our measurements within 1-2mm, so that every card can fit perfectly.

The details put into the corners can be felt by hand, although they cannot be seen. Our products are very strictly produced so that all edges are precise, and each edge is not stiff. In fact, while holding the case, you will find it to have a gentle, yet strong, feeling.

For removal of the case, it uses a magnet-type disassembly, making it more convenient and simple to use.
