## Monkey Fist Final Load Ball by Leo Smetsters

Leo Smetsters has enlarged his category of balls with a **Monkey Fist Final Load Ball**. The ball is made of ropes, which makes it easy to hold in the palm of your hands.

Furthermore, these balls are a bit heavier and so they are nice to handle. Regardless of the temperature, with the rope material you always have a grip to easily manipulate these balls. Last but not least, the balls do not roll as far as normal balls - perfect for your final load!

These **Monkey Fist** knotted balls (regular as well as **Final Load**) are great to add to your Cups and Balls tricks assortment. The size of this **Monkey Fist Final Load Ball** is 56mm.
