
Gripper Coin (Set/U.S. 25) by Rocco Silano

Have you ever thought of getting into coin magic but were put off by all the hard coin sleights that comes with it?

Well, we have now solved that problem. Introducing the **Gripper Coins**. The **Gripper Coins** are a special, handmade coin that has a space-age silicone band embedded into the edge of the coin which prevents it from slipping in just about any palming position you decide to use. For the beginner coin workers, the **Gripper Coins** will enhance your learning process immensely when you are practicing your various palming moves. And for the seasoned professionals, the **Gripper Coins** will give you that sure-locking feel in any of your desired coin palms. The **Gripper Coin** comes in 6 different denominations, the U.S. quarter, the U.S. half dollar, the Euro 50 cent piece, the British 10 pence, the U.S. Eisenhower and the English penny.

When purchasing any of the above **Gripper Coins**, you will receive a step-by-step video tutorial from Rocco Silano on how to use the **Gripper Coins** properly. Rocco will also teach you over a dozen coin moves and routines. But remember, the **Gripper Coins** are truly limited only by your imagination. Good luck and have fun with the **Gripper Coins**, my fellow coin workers. Thank you, Perry Maynard.
