## **OOPS Magic and Mentalism by Paul Hallas - Buch**

A fun collection of over fifty magic and mentalism effects and ideas, shared in an easy-to-read style. Some you will be performing these almost instantly, others may require easily obtainable props or props you may already have or can create. Some of the non-card items previously appeared in Paul's "OOPS" eBook series, now together under one cover to make your bookshelf look nicer!

Effects in this collection demonstrate time travel, remote viewing, causing thought-of cards to travel inside a spectator's wallet, the hypnotic qualities of rare berries, and demonstrating that love conquers all with a few alphabet cards. And there's a lot more! It's Paul's most diverse collection since Magic From The Overground.
