
SMOKE CUBE by João Miranda

Looking to enhance a great moment with the production of smoke? Read on!

After the success of João Miranda's smoke watch (performed by David Copperfield on TV), is the highly-anticipated arrival of **SMOKE CUBE**. It is the smallest smoke machine in the world, created with the professional in mind.

Includes 10 FULL routines with purchase so you can get started right away!

Here are some of the amazing features of this small but amazing smoke device:

- It's got a great grip surface that allows you to classic palm it easily, due to the **anti-slippery material** used in the construction of the gimmick. That way, you can apparently show your **hands empty** while producing a beautiful cloud of smoke.
- It is **programmable** from 1 to 20 seconds, meaning that you can be **hands free** when the smoke is produced.
- The cube has one **built-in strong magnet at the bottom**, so that you can attach it to any prop in a moment's notice, or even to your jacket's sleeve.
- You can install the cube into any illusion like the **Devil's Hank** or even the classic **Smoke Glass**, GREATLY enhancing the final effect.
- The **unit vibrates** right before the smoke starts producing. This is **essential** for the working professional.
- There are **no remote controls to worry about**. Everything is self-contained in the device.
- The cube allows for a reel attachment, so the magician can show his hands empty after the smoke production.
- The battery is **rechargeable** by the included USB cable.
- Refilling the gimmick takes **only 3 seconds**, and you can do it on the go.

- For **FREE**, you receive **an extra custom piece** with a built-in magnet, so that you can attach the smoke cube to a pocket, a prop or even sew it to a cloth.

- Due to the way the cube is engineered, you can **activate the gimmick while in classic palm** without the help of the other hand.

- The **SMOKE CUBE** allows for **programming** (smoke delay after the button is pushed) or you can activate the **live mode** (the smoke is produced continuously until the button is pushed again).

The device comes ready to use with a custom-made EVA pouch for transport, USB cable, liquid, and full instructions.

SMOKE CUBE is proudly made in Portugal by João Miranda and his incredible team, known for producing some of the finest magic in the world today.
