
Unicorn Cork by Nick Einhorn

A great improvement to the Coin-In-Bottle effect!

Nick Einhorn has produced the most cost-effective, versatile and ordinary-looking hollow cork currently available.

This gimmick will safely hold a range of standard double-folding coins, including the US half dollar, quarter, UK 50p, £2 coins, and any coin of similar size.

Made of real cork and lined inside with a non-stick coating, your double-folding coin will fit snugly inside and remain perfectly hidden until you are ready to perform.

Also included is Nick's own Coin-In-Bottle routine, which includes the appearance and vanish of the bottle!

Please note that you will need to supply your own bottle and folding coin.

TESTIMONIAL

"The reason I like your cork gimmick is that it fits into the mouth of a bottle easily (Coke, beer, etc.). There are other cork gimmicks, however, they do not fit into smaller bottles and some are not real cork and do not taper. So far as I can tell, your cork is the only one that really works with most bottles and looks like a real cork!"
