
FIVE IN A HOLE by SMagic Productions

A good piece of magic is magic that looks totally impossible. Modern magic is visual - people are amazed when they can actually see magic happening instantly. At those times, they are stunned in silence by what has just happened. Welcome to **FIVE IN A HOLE**, which achieves BOTH of these objectives: magic that looks absolutely impossible, and visually happens in an instant!

Two bills (\$1 and \$5) are removed from your wallet and presented to the audience. You ask a spectator to hold the \$1 bill and you hold onto the \$5 bill. Then, with just a little touch of these two bills together and a magic snap, a number 5 is now printed on the \$1 bill! And that's not all - the 5 is GONE from the \$5 bill - it is now just a hole! The spectator can then examine the money that they are holding in their own hands as much as they want, and they absolutely pause in stunned silence by what has just happened.

It's a highly visual money effect that fits right inside your wallet and plays big for a full crowd. It's easy to do and resets instantly. Grab yours now!
