## **Bottle Production Box by Mr. Magic**

The performer introduces a rectangular wooden box with a hole on top. He turns the box to show its front and back. He opens the back door and front door of the box one after another. The interior of the box is seen to be completely empty. He then closes the front door and back door one by one and turns the box once again to show the back side of the box. Finally, he opens the front door and a bottle is seen in the box. He closes the door and lifts the bottle through the top hole and places it on the table. The box is again shown empty by opening the back and front doors. The doors are closed. Front door is opened. Another bottle is seen inside. The bottle is brought out through the top hole and placed beside the first bottle. This happens over and over again until FIVE bottles have magically been produced!
