
Billet Box (Wood) by Mr. Magic

This is a utility item that has many uses. We include some routines to get you started. Undoubtedly, you will come up with many more of your own. Basically, this is used to force small billets (paper having a forced color, number, etc., written on them). You can also force any small items like beads, chips, etc. You get a specially prepared wooden drop box. Though the drop box looks innocent, it has a secret chamber that enables you to force the item you desire. It allows you to create miracles!
