
Bicycle Fireflies - Pokerdeck

There is nothing more special than sitting out on the porch during a warm summer night and watching fields of fireflies... until now. We are here to bring the magic of those summer nights to you with the **Bicycle Fireflies Playing Cards** by Collectable Playing Cards. This custom design will surely stand out in your collection as an instant favorite.

The tuck case design was created to make the fireflies really stand out. We incorporated a pitch-black backdrop and used neon greens and yellows to spot the stunning glow effect. In the center, we decided to incorporate the classic spade with a silver accent, which goes nicely with the overall look of the deck.

We created the card backs with 3 glowing orbs, which gives them a tantalizing optical perspective. We continued with the neon theme along with two little fireflies shining their lights. In addition, we added some golds and silvers to the back for more life.

The court cards are standard gold and black, but they also contain the neon specks of flies.

For the numbered cards, we went all out with hundreds of specks of fireflies slowly expanding from the center to the brim.

You'll love how all these special touches come together in a realistic way!
