## **P&L Goblin Phantom Tube by P&L Magic**

Audiences love surprise productions - they wonder, "Where did this come from?"

A startling visual appearance! A tube is held up to the light to show it empty. It is now held in the palm of the hand. Small pieces of tissue are placed over each end, one at a time, forming a drum head. The tissues are broken, and **SILKS NOW APPEAR** from the tube that, just moments before, had been shown empty!

(NOTE: Can be used with other apparatus so that items are first vanished, and then magically appear in the tube! Use your imagination!)

All self contained, no thumb-tips or pulls. A quality P&L Product.

Included: A 5" inch nickel-plated tube with rings.
