
CGI by James Keatley

The impossible has just become possible. Imagine: you draw an object on the back of a playing card. With a wave of the hand, the REAL object materializes and the drawing has vanished. All in the blink of an eye. VISUALLY! Your stunned audience witnesses this miracle and cannot believe what just happened!

"This really looks like **CGI**."

- **Eric Jones**

A way to draw an object on a playing card and then have the object you have drawn materialize into your hand, in real time, has now arrived; this is about as visual as it gets.

Turn 2D sketches and stickers into real, 3D objects. It's your own, personal **CGI**!

Create videos that look just like **CGI** on screen. Blow people away face to face; they literally won't believe their eyes.

CGI comes ready to perform straight out of the box. It's easy to use and the self-contained gimmick does all the work for you.

You receive:

- Custom-made **CGI** gimmick
- 3 readymade gimmicks (Rubik's Cube, dice, Lego)
- Custom stickers to use in your routines
- Repair kit

"That's F\$%?#ING Amazing! I'm definitely using this."

- **Julius Dein**

"This is my kind of magic! Very well made and self-contained. It looks how it should, like a Camera trick!"

- **Nicholas Lawrence**

"Super visual. Limited only by your imagination."

- **Chris Webb**
