
Flexible Mirror/Needle Through Mirror by Tony Karpinski

Imagine this impossible scenario, because it blows the audience away!! The **Needle Through Mirror**, also known as the **Flexible Frame**, allows the performer to place a wood-framed mirror into a cloth bag and, upon command, push a standard knitting needle through the solid mirror. Astoundingly, the magician then **BENDS** the solid frame without destroying the frame or mirror. It is removed from the cloth in one piece and totally intact - unbroken!

Included with this effect are the framed mirror, a cloth carrying bag, and a knitting needle in a protective case.
