
Fantoma's Box by Nahuel Olivera

This one is WILD! It's a great way to produce items magically. Open a black box, and remove a white box from it - the white box practically filled the entire space of the black box. Open the white box and remove items from it. The black box is then shown to ALSO have large items inside. How can this be? There was no room for them! Best of all, they're not crushed or damaged in any way.

Fantoma's Box is specially designed for you to magically produce items of your choice. The effect is awesome!!!
