**magician/mentalists, Jon Stetson:**

*"To me, the most valuable purchases I make are the ones that take stress out of my life. The Lewin mic holder does that very thing. In my work, I'm flying from place to place over 250 days a year. It's not practical for me to carry sound equipment. Although I have a thorough contract rider requesting my needs for sound, lights, and staging, you never know exactly what you are going to find on arrival. Many clients don't fully understand the needs of a performer. The small silk bag that contains two of the mic holders are my insurance that I will not have any logistical microphone issues!*

*"So, use it in every performance or carry the small pouch with you for insurance. It is the best thing I have put in my case in 10 years.*

*"Bottom line, **Nick Lewin's Mic Holder** belongs in the working case of EVERY magician or mentalist."*
