
Ebony Jumping Gems by Rich Hill

This beautiful **Ebony Jumping Gems** set was inspired by a conversation with magician Josh Silverstein.

Effect: The magician produces two genuine ebony rods and shows them empty on both sides. With a flourish, a gem appears on one of the rods. The gem is then "tossed" to the other rod. Tap the rods together, and now they both have gems. Magically transfer one of the gems to the other rod, and now it has a gem on each end! Next, one of the gems travels down the rod and the rod now has two gems on one end. The effect features a color changing gem, and finally a beautiful finish: 2 gems become 6, and 6 gems become a total of 12 gems, six on each side! This routine looks like real magic... your audiences will love it!

Featuring large 7mm Swarovski crystal jewels, these fine quality rods are made from African Ebony wood. Beautifully hand-textured for faultless handling. A joy to use!

This amazing piece of close-up magic is handcrafted!

3 5/8" long by 3/8" wide by 1/4" thick.
