
Lexicology 2.0 With Telepathy Card by Paul Carnazzo

Now made of 100% plastic!!

Lexicology is the latest addition to wallet mentalism!

The card appears to be an authentic "Telepathy Testing Card" from the **National Institute of Parapsychology**.

Perfect for anytime, walk around and close-up mentalism! This is a complete routine that fits neatly in your wallet! Be ready to perform multiple miracles with just one compact card!

The card contains 41 words (all different). It is displayed to the audience, and both sides are shown to contain all different words.

One to four spectators think of a word on the card.

The mentalist asks the 1st spectator to form a mental image of their word. The mentalist immediately reveals the image in the spectator's mind!

The 2nd spectator is asked to think of a different word that can be linked to their word... the performer immediately reveals the newly thought-of word!

The 3rd and 4th spectators are asked to concentrate on their words, and the mentalist reveals these words in a very direct fashion!

As noted, the card can be used for one to four spectators at a time. If using one spectator, however, he/she can select multiple words, and the performer will correctly reveal the thought-of words.

There are some additional effects on the card, making this tool quite versatile!

The following is true about **LEXICOLOGY**:

- Made of 100% plastic... extremely durable!
- All the words on the card are different
- No progressive anagrams
- Nothing written down

-
- No dual reality
 - The card is un-gimmicked
 - Completely fair selection process

Includes the double-sided card and instruction manual.
